

LEONARDO ZAVALA-JIMENEZ

lzavalajimenez@ucdavis.edu • (916) 896-6206 • personal-web-lzj.vercel.app • Sacramento, CA

EDUCATION

University of California, Davis

Expected 2026

Bachelor of Science in Computer Science, Statistics Minor

- Coursework: **Operating Systems**, Algorithm Design & Analysis, Data Structures, Artificial Intelligence, Linear Regression, Computer Architecture, Applied Statistics in Biological Science, **Software Engineering**

SKILLS

Languages: Python, R, Java, Javascript, C, C++, TypeScript, Haskell, Rust

Frameworks & Tools: React, Node.js, SQL/SQLite, GitHub, Tailwind CSS, Tableau, Prisma ORM, Resend

Specializations: Data Analysis, Machine Learning, Software Engineering, AI

Soft Skills: Team Leadership, Mentorship, Cross-Functional Collaboration, Exemplary Communication

PROJECTS

Software Engineer, Department of Internal Medicine @ UC Davis

Jan 2026 — Present

- **Architecting and developing a Next.js + TypeScript** funding workflow system projected to save 250+ hours annually by digitizing 500+ departmental submissions.
- **Designed relational data models** using **Prisma ORM** to manage funding requests, approval states, and revision history with end-to-end type safety.
- Implemented secure, **tokenized email-based approval system** via **Resend**, enabling asynchronous multi-stage review and automated status tracking.

Software Lead, MuscleMax Startup

Jan 2025 — Present

- Leading development of a React Native app integrated with a **custom EMG device** using **React Native, TypeScript, SQLite, and Node.js**
- Collaborating with a **5-person cross-functional team** (software, hardware, business)
- Designed and implemented backend architecture for **real-time muscle activity tracking** and **live graphing**

GitHub Data Fetcher

Sept 2025 — Nov 2025

- Developed a **Rust CLI tool** that interacts with the GitHub **REST API** to retrieve repository and issue metadata
- Stored structured JSON objects in **Redis** for fast retrieval and caching, improving query efficiency and reducing API calls by **80%**
- Applied **asynchronous programming, error handling, and modular design** to build a reliable and efficient backend data pipeline

Front-End Developer, Top Garden Landscaping & Design

Dec 2024 — Apr 2025

- Built and deployed a **responsive client website** using React and Tailwind CSS
- Improved client visibility and customer inquiries by **40%** through optimized design
- Applied efficient **communication and design iteration with the client** and teammate

LEADERSHIP

National Outreach Lead / Project Manager, ColorStack @ UC Davis

Dec 2023 — Present

- Represent UC Davis in national ColorStack meetings; maintain documentation and reporting
- Planned events increasing membership by **30%**, supporting underrepresented students in tech
- Overseeing **website creation progress & GitHub repository**, improving members' technical collaboration

WORK EXPERIENCE

Groundskeeper, ASUCD Campus Center for the Environment

Aug 2025 — Present

- Maintain and enhance campus garden spaces, ensuring safe, sustainable, and visually appealing environments for students and visitors.
- Coordinate with ASUCD staff to implement environmentally conscious landscaping practices.
- Engage with clients and stakeholders to resolve concerns, provide recommendations, and support project execution.
